

FIG. 1 is a schematic diagram of a system 10 for testing a device 11. The system 10 includes a power source 12, a control unit 13, a test chamber 14, and a test device 16. The power source 12 is connected to the control unit 13, which is connected to the test chamber 14. The test chamber 14 is connected to the test device 16. The test device 16 is connected to a ground 17. The system 10 is used to test the device 11 by applying a voltage to the test device 16 and measuring the current flowing through it.

Fig. 5a

FIG. 5 is a perspective view of the device 80 in a closed position. The device 80 includes a housing 12, a lid 14, a handle 16, and a hinge 17. The lid 14 is hinged to the housing 12 at the hinge 17. The handle 16 is attached to the housing 12. The device 80 is shown in a closed position, where the lid 14 is resting on the housing 12.
